

# TempVision™

A complete temperature monitoring system, TempVision™ allows food-service and healthcare businesses to remotely monitor temperatures from multiple locations to ensure optimum efficiency, safety, and compliance. TempVision™ gives management the flexibility to monitor multiple data points within a facility, from walk-in coolers/freezers, reach-in refrigerators/freezers, and hot/cold holding units. When an event is detected, alerts are instantly generated and sent via email and text message to appropriate personnel.

## Why TempVision™?

- 24/7 remote temperature, humidity, door open/close monitoring
- One piece of software, unlimited points (desktop/tablet/mobile, etc.)
- Web-based user interface
- Live monitoring and alerts

## Markets

FOOD

PHARMACEUTICAL

**Protect and monitor your products, in real time.**

# TempVision™

## Features:

### Wireless

Easy installation; battery-operated sensors with 2-year life

### Auto Alerts

Provides alerts through email and text message for out of range events

### Unlimited Monitor Points

Enough flexibility to monitor all critical items: cooler, freezers, refrigerators, etc.

### TempVision™ Dashboard

User-friendly interface shows multiple data points or locations at a glance

## Cost-Saving Benefits:

- Reduces labor cost and errors by eliminating manual processes
- Prevents waste and spoiled product by early detection
- Saves energy by revealing system inefficiencies
- Decreases down time by sending alerts directly to maintenance staff
- Optimal product temperature storage extends product usable life
- System continues recording during power outage situations
- Assists in maintaining regulatory compliance of the Food Safety and Modernization Act

## More Than Restaurant Monitoring:

> TempVision™ seamlessly monitors distribution channels and warehouses, keeping every step of your supply chain secure.

## Integration over Multiple Platforms:

### Desktop

#### Office and Home.

Easy-to-navigate user interface for monitoring all data points or locations.

### Tablet

#### Office, Home, & Travel.

Accessibility remains in the cloud. Access live monitoring and alerts on the go.

### Mobile

#### Anywhere, Anytime.

Access the Q App to remotely manage your locations. Receive alerts by email or text.
