

Power In-Lock™

“You can’t break when you can’t see!” Power In-Lock™ is a patented, electronic locking system that - unlike traditional trailer locks - mounts on the inside of the truck, trailer or container, making it impossible to see, access, or tamper with from the outside. A keyless system, it eliminates lost, stolen or damaged keys, or compromised locks.

Power In-lock™ also goes beyond cargo security by logging all door activity - open/closed, time, date, and personnel. Additionally, the entire system can be integrated with telematics to provide location, remote locking/unlocking functions, and an electronic log of all activity. Telematics also allows seal verification electronically, which replaces wasteful disposable seals and can even assist in regulatory compliance.

The proven solution for securing trucks, trailers & containers.

The Power In-Lock™ Difference:

- Internally mounted; lock cannot be accessed or tampered with
- Keyless system
- Records and logs all door activity
- Telematics allows for electronic seal verification

Applications

INTERMODAL/
OCEAN CONTAINER

FULL
TRUCKLOAD

RAIL

LTL

Markets

FOOD

PHARMACEUTICAL

PAINT/
CHEMICAL

COSMETIC

Power In-Lock™

Eliminates:

Lost/Missing Keys

Prevents logistic problems of key management.

Physical Access Problems

Alleviates problems such as dirt-filled, frozen or corroded locks.

Internal Theft

Greatly reduces potential due to activity/access logs.

Fraud

Renders false paperwork useless in gaining access to cargo.

More Than Cargo Security:

Records and Logs all door activity. Power In-Lock™ can track all events such as door open/door closed, time and date of access, who accesses the cargo, and more.

Allows electronic seal verification. Container integrity can now be assured via the electronic access log. This saves time and waste by eliminating the need for disposable, tamper-evident seals.

Helps assist with regulatory compliance. Power In-Lock® was designed with regulatory legislation - such as the Food Safety Modernization Act (FSMA) in mind. Power In-Lock™ provides effortless monitoring and documentation to ensure against tampering.

Compatible with Most Door Systems:

Refrigerated Trailer

Roll-Down

* US Patent Numbers: 7,059,159, 7,091,857, and 7,501,946

Security is only as good as the structure of the door.
