

QuiltTracker

Quilt Tracker is a cloud-based web portal that allows participating facilities to track and manage CargoQuilt® inventory across the entire network.

Each CargoQuilt has an RFID tag and QR Code that is associated to a unique serial number that can be seen on the actual quilt. All quilts are scanned on outbound and inbound protected loads via the new mobile app to ensure accuracy. Data is then transmitted through the cloud, onto the web portal database for network wide visibility. Quilt Tracker allows a facility to effectively manage blanket flow without having to add resources.

Why QuiltTracker?

- Allows you to manage inventory remotely, or while traveling
- Reduces the potential for human error; no need for counting or manual tracking
- Allows multiple credential levels for various employees and/or partners
- Logs user activity for increased accountability

Markets

Manage Your CargoQuilt Fleet. Anytime, Anywhere.

QuiltTracker®

Assigned Credentials:

Your facility maintains direct control over assigning and removing credentials for any user in its network. Plants, distribution centers, network partners, and carriers can be granted access based on their relevance to the program. QuiltTracker has multiple credential levels.

Entry Level

Person(s) scanning quilts on outbound/inbound loads and assigning detail relevant to that shipment (i.e. order number, destination facility, etc.).

Supervisor

Access to all info relevant to their location, including available inventory, status of quilts being returned to location and limited reporting.

Administrator

Complete visibility of entire network and access to run usage reports that will help determine future inventory needs and increase accountability amongst users.

Live Maps:

Live maps allow fluid scrolling and zooming in down to the street level, for full visibility.

Integration over Multiple Platforms:

Desktop

Office and Home.

Easy-to-navigate user interface for shipping, receiving and tracking your CargoQuilt® fleet.

Tablet

Office, Home, & Travel.

Accessibility remains in the cloud. Access, manage & track away from the office.

Mobile

Scanning and Travel.

Access the Q App to remotely manage your fleet. Scan to ship/receive from your mobile device.
