

Technology Deployment Provider

Turn Your Trailer Into a Safe

Keep Your Cargo Protected
For The Long Haul

Power In-Lock locking system

What is Power In-Lock?

Power In-Lock is QProducts & Services' patented, internally mounted locking system for trailers and containers. The system automatically locks when the door is closed and monitors all door openings and closings which can be tracked through its software for complete visibility.

This unique device is widely used across many industries to secure storage containers, including but not limited to:

- Dry and Refrigerated Trailers
- Over the Road, Rail and Intermodal Use
- Storage and Custom Applications

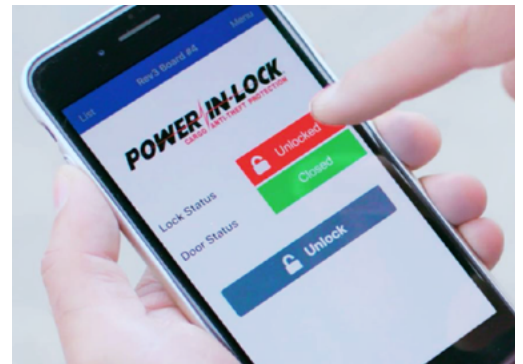

Software Platform: Web & Mobile

The Power In-Lock software platform allows:

- **Secure Control Center**
Authorizes All Users and Devices
- **Customize** User Roles and Permissions
- Expiration Times and **“Locked Out”** Features
- Send Lock/Unlock Commands via **Bluetooth**
- **One Time Access** (No Cellular Connection)
- Audit **Verification** Upon Delivery

Power In-Lock has two power source options to fit your needs:

- **Existing** Sources
- **Solar Power** for Remote Locations

Velociti & QProducts & Services

Velociti is proud to be the exclusive, certified installation partner of Power In-Lock.

Our highly trained technicians provide seamless deployment of your Power In-Lock systems to ensure your cargo is safe for the long haul. And with nationwide coverage, we'll work around your schedule to ensure your business continues running smoothly.
