

## CargoQuilt®

By creating a thermal barrier over your products, CargoQuilt® protects from both heat or cold, as well as other environmental hazards. Developed as an alternative to transporting temperature-sensitive cargo under refrigeration, CargoQuilt® captures the existing environment of the freight and maintains that temperature range throughout the delivery process.

Once the cargo is loaded on a trailer or container, CargoQuilt® is easily applied over the loaded cargo. The CargoQuilt® can maintain the temperature of the freight - whether hot or cold - from 5 up to 30 days.

### Why CargoQuilt®?

- Protects from both heat and cold
- Multi- or limited use
- Accommodates all styles of containers and trailers
- Applied and removed in minutes

### Applications

### Markets

## Help your products hold their integrity.
